EXXACT

Integration & Infrastructure Services
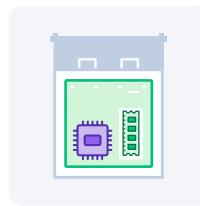

Delivering tailored computing solutions from advanced component integration to full-scale deployment and support.

## Delivering Custom Configurable Deployments

From Start to Finish L6-L12

Exxact assists in determining the exact solution to address any computing need. From L6-L12 manufacturing levels, we deliver solutions from start to finish.

L6-L7: Essential Component Assembly

Precision assembly & configuration of critical components, such as CPUs, motherboards, and memory, ensuring optimal performance and reliability.
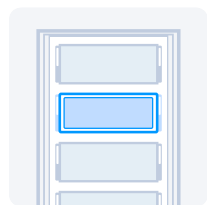

L8-L9: Add-on Accelerator & Storage Assembly

Comprehensive hardware, software, & driver installation, tailored to client specifications, including GPUs, storage, and networking.

L10: System Testing and QA

After systems are assembled, they undergo rigorous testing and quality assurance standards to ensure flawless operation as fully integrated systems.

L11: Node-Level Assembly and Rack Integration

Exxact RackEXXpress is our full-service node-level and rack-level installation & support. Each deployment is thoroughly tested & validated as a whole cohesive HPC solution.

L12: Logistics & Deployment

Exxact ensures efficient and reliable delivery of fully configured rack and cluster systems to client data centers and colocation facilities with pre- and post-deployment installation.

Comprehensive Integration Services

Leverage Exxact's hardware expertise for scalable computing solutions. We configure, build, and support mission-critical AI and high-performance computing systems across industries.
