

Two is Better Than One

Strengthen Your Infrastructure with Strategic Dual Sourcing

Redundancy is vital in data centers, just as it is in supply chain and integration partnerships. Relying on one hardware partner for rack integration services & data center expertise can hinder business agility. Dual sourcing with Exxact doesn't replace your existing vendor—it builds redundancy to safeguard operations and unlock vendor-specific strengths:

- Reduced dependence ensuring business continuity
- Flexibility during peak demand/supply scarcity
- Expanded capabilities
- Promotes pricing and lead-time competition
- Geographical redundancy & coverage
- Faster adoption of newly released hardware

Secondary Support, Primary Performance

With over 30 years of industry expertise, Exxact's deep ecosystem partnerships, optimized fulfillment pipeline, and flexible deployment options help reduce lead times and total cost of ownership—giving you primary-level performance, even as a secondary vendor.

Configurable Workstations and Servers

Our engineers help determine the ideal solution and configuration based on your prerequisites, budget, and deployment style. Whether it's a fleet of workstations or multiple GPU compute servers, we ensure platform flexibility and configurability to match your needs.

- Extensive workstation and server platform options
- Access to most modern GPU accelerators
- Tested and validated to ensure day-one operational

RackEXXpress Integration Services

With RackEXXpress, Exxact integrates our systems into your existing computing infrastructure and handles the entire rack integration process. Every system goes through evaluation, assembly, validation, and deployment, with support for any scale of deployment, making our rack integration process as seamless and painless as possible.

- Rack integration of full or partially filled racks
- Rack-ready nodes for existing rack infrastructure
